SEARCH REQUEST GUIDELINES

The *PASAR* Request Form has been designed to assist you in constructing a comprehensive statement of your requirements. However, it should not restrict your input. Provide whatever other information you feel will augment the information specialist's understanding of your requirements. The following guidelines should help to clarify items on the request form.

ITEM 1.
Narrative statement of search topic.
Provide a detailed description of the subject matter you wish to have retrieved. Be specific and define terms which have special meaning in the context of your request. Qualify search topics representing intensively researched areas or of broad scope by stating elements of interest. Please avoid submitting multiple, discrete requests on a single *PASAR* Request Form, since such requests cannot be processed for a single fee. However, multiple aspects of a primary subject may be requested. The distinction is illustrated in the following example.

Acceptable: "the effects of socioeconomic status, education level, or birth order on career motivation in women."

"Career motivation" is the primary element of this request, while the other elements serve merely to qualify or narrow the scope of this rather broad subject area.

Unacceptable: "the measurement of employee attitudes concerning wages and benefits. Also desire references dealing with the factors that influence management decision-making with respect to personnel policies and procedures."

Although these two topics are closely related to the design and administration of personnel policies and procedures, two separate search strategies would have to be executed to retrieve the specific information requested, and there would have to be a separate charge for each.

ITEM 2.
Population.
Population requirements are often essential to the actual information need; however, they can unnecessarily limit the search, causing retrieval of few of the relevant records. Therefore, consider your requirements carefully.

ITEM 3.
Search qualifications.
Once the subject matter of the search has been defined, you may wish to refine it by time span, article language or document type. Dissertations are covered in PsycINFO by citation only.

ITEM 4.
Sorting requirements.
Please indicate whether you would prefer to have references sorted alphabetically by author or journal name, or chronologically by year.

ITEM 5.
Intended use of search results.
Provide a description of how the references resulting from your search will be used (e.g., definition of a research project, preparation of an article, proposal preparation, dissertation, etc.).

ITEM 6.
Size of retrieval.
The number of references which may be retrieved varies considerably according to search topic. Retrieval may be limited or extended by changing the specifications for population, other variables, or search qualifications. Large retrievals will be limited by providing the most recent references until the $100 charge is reached. Indicate if you wish retrieval to be limited differently. If there are few references to be retrieved, consider extending the previously designated search specifications.

Here's how to order your customized computer search easily, quickly, inexpensively.

ORDERING INFORMATION

When ordering a *PASAR* search, please read the guidelines carefully before completing the request form. A purchase order must accompany all institutional requests for a *PASAR* search. For individuals requesting a *PASAR* search, the signature of the person responsible for payment *must* appear on the *PASAR* request form.
